**Abstract:** The paper presents the results of the ongoing research of lichen diversity in Arkhangelsk Region of Russia, in Vodlozersky National Park which is the largest protected area in the territory of NW Russia. In total, 155 species of lichens and allied fungi are recorded for the first time for the Arkhangelsk part of the Vodlozersky National Park, and 69 species – for the whole mainland area of Arkhangelsk Region.

**Keywords:** lichen diversity, new lichen records

## INTRODUCTION

Nowadays when the environment has been strongly transformed, nature protected territories play the significant role in the conservation and maintenance of main typical landscapes and biodiversity in natural state.

Vodlozersky National Park is one of the largest (468,300 ha) protected areas in the territory of European Russia, as well as in whole Europe. The park is located within two administrative regions: Arkhangelsk Region (337,600 ha) and Republic of Karelia (130,600 ha). The territory of the park is extended from north to south and covered by different types of communities. Northern (Arkhangelsk) part of the Park represents the territory of northern boreal subzone with old-growth forests, high habitat heterogeneity and climatic features which are related to the vicinity of the White Sea. The low-mountain ridge Vetreny Poyas (in engl. *Windy belt*) located here is assumed as the edge of Baltic shield and transition zone to European Plain.

Furthermore, in such environmental conditions (northern boreal zone, relief changes, vicinity of

the sea), old-growth forests which have never been subjected to clear-cuts (with the exception of selective cuttings near the villages which have been abandoned at present time) occur. Thus, the unique nature communities in this territory have mainly determined the status of Vodlozersky National Park as UNESCO Biosphere Reserve since 2001.

Despite more than 25 years of lichenological studies in Vodlozersky National Park, only scattered data can be found in various sources which mainly describe the lichen diversity of the Karelian part (Tarasova & Stepanova, 2001; Tarasova & Stepanchikova, 2016; Tarasova et al., 2016, 2017; Ignatenko & Tarasova, 2017; Androsova et al., 2018). Description of the history of lichenological studies in this territory is provided in Tarasova et al. (2016). The lichen inventory of the Arkhangelsk part of the Park has recently begun (Tarasova et al., 2016). In general, the lichen diversity of the Arkhangelsk Region is still poorly known compared to other regions of Russia.

Long-term lichen inventories in such an etalon territory as the Vodlozersky National Park increase our knowledge of biodiversity as the Park contributes significantly to the maintaining of species pool in the region where most forests have been cut down during the last 100 years. The present study focuses on the new records of lichens and allied fungi for the Arkhangelsk part of Vodlozersky National Park and the whole mainland area of the Arkhangelsk Region.

## MATERIALS AND METHODS

The study area is located in the north-western part of the Arkhangelsk Region, in the northern part of Vodlozersky National Park (Fig. 1.), about 40–70 km from the coastline of Onega Bay of the White Sea. The environmental characteristics of the area were described in detail in our previous papers (Tarasova et al., 2015, 2016).

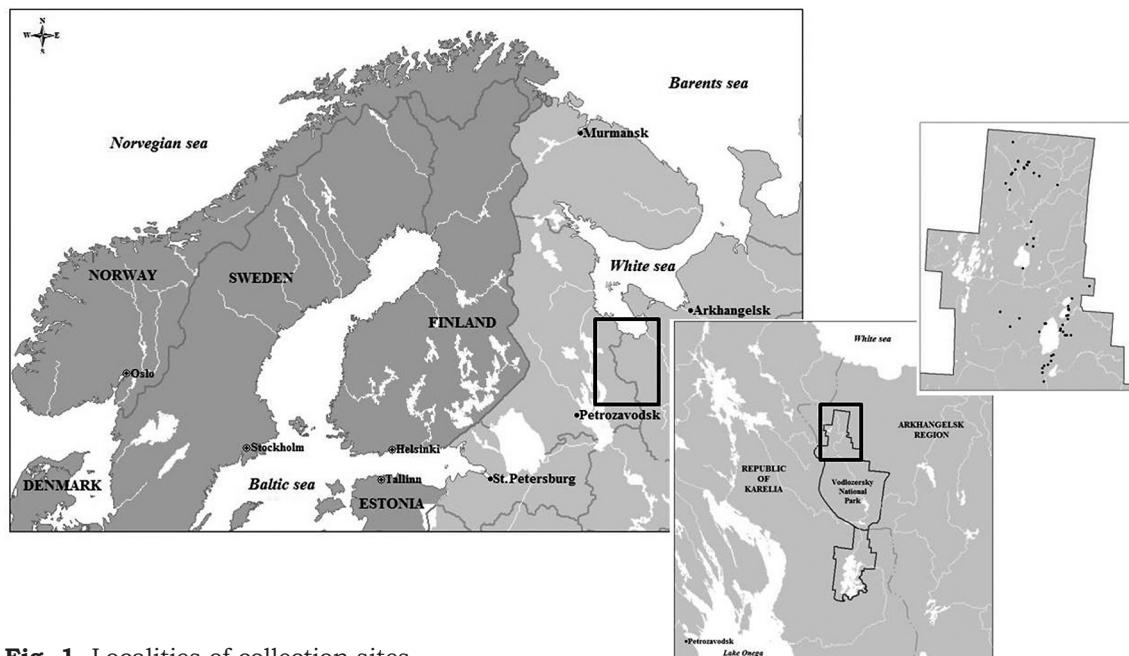

The field work was carried out by the first five authors during six expeditions in 2010–2018. Specimens were collected in different types of communities from swamps and old-growth forests (with age exceeding 200 years) to overgrown fields around abounded villages. The main phorophytes were spruce (*Picea obovata* Ledeb. and *P. abies* (L.) Karst.), birch (*Betula*

*pubescens* Ehrh.), aspen (*Populus tremula* L.), rowan (*Sorbus aucuparia* L.), willow (*Salix caprea* L.) and pine (*Pinus sylvestris* L.).

The collected material, a total of ~1800 lichen specimens, was identified using standard microscopic technique and spot tests. The specimens of the genus *Cladonia* and sterile crustose lichen species were identified using thin-layer chromatography (TLC) in the Laboratory of Experimental Botany of Petrozavodsk State University (Petrozavodsk) and high performance thin-layer chromatography (HPTLC) in the Laboratory of Lichenology and Bryology of Komarov Botanical Institute of RAS (St. Petersburg), implementing solvent systems A, B and C (Orange et al., 2001). The specimens of *Peltigera* were confirmed by Orvo Vitikainen (Botanical Museum, University of Helsinki). The cited specimens are deposited in the Herbarium of Petrozavodsk State University (PZV) and Komi Research Centre (SYKO).

## LIST OF SPECIES

Taxa are arranged in alphabetical order; nomenclature of lichens, lichenicolous and non-lichenized fungi follows Nordin et al. (2011). For each species the localities, habitat types and substrates are listed. Lichen substances are given for TLC-analyzed species.

**Fig. 1.** Localities of collection sites.

Abbreviations and symbols: # – lichenicolous fungi; + – non-lichenized fungi; ! – new species for mainland area of Arkhangelsk Region. Species included in the Red Data Book of Arkhangelsk region (2008) are marked as RA. The names of the main collectors in the species list are abbreviated as follows: AS – Angella Sonina, AV – Andrey Valekzhanin, ECh – Elena Churakova, TP – Tatiana Pystina, VA – Vera Androsova, VT – Viktoria Tarasova.

Abbreviations of forest communities and other habitats:

Ssph – spruce swamp forest of *Sphagnum* mosses type;  
 Sher – spruce forest of wet herb-rich type;  
 Smyr – spruce forest of *Vaccinium myrtillus*-feather mosses type;  
 Sroc – spruce rocky forest of *Vaccinium myrtillus*-feather mosses type;  
 Sbir – mixed spruce-birch rocky forest of lichen-feather mosses type;  
 Spin – mixed spruce-pine forests of *Vaccinium myrtillus*-feather mosses type;  
 Psph – pine forest of *Sphagnum* mosses type;  
 Pvit – pine forest of *Vaccinium vitis-idaea*-feather mosses type on top of the ridge;  
 Plich – pine forest of *Calluna vulgaris*-lichens type on the ridge;  
 Pmyr – pine forests of *Vaccinium myrtillus*-feather mosses type;  
 Proc – pine rocky forest of *Vaccinium myrtillus*-feather mosses type;  
 Pspr – mixed pine-spruce forest of *Sphagnum* mosses type;  
 Psb – mixed pine-spruce-birch forest of *Sphagnum* mosses type;  
 Bspf – birch forest of *Sphagnum* mosses type;  
 Bher – birch herb forest of feather mosses type;  
 Basp – mixed birch-aspen forest of feather mosses type;  
 Aher – aspen herb-rich forest of feather mosses type;  
 Sw – *Sphagnum* swamp with pine;  
 FR – old forest road;  
 AbVi – abandoned village, meadows, freestanding trees;  
 Rsh – river bank;  
 R – rocks, boulders.

ALYXORIA VARIA (Pers.) Ertz & Tehler – on bark of old rowan, 63°19'19.6"N, 36°43'12.2"E, Spin, 04.07.2016, leg. TP, SYKO.

AMANDINEA PUNCTATA (Hoffm.) Coppins & Sheard. – on bark of willow, worked timber, 63°19'39.3"N 36°42'15.6"E, AbVi, RSh, 15.06.2011, leg. VT, PZV; 63°19'45.9"N 36°42'17.5"E, AbVi, 01.07.2016, leg. TP, SYKO.

ARTHONIA DISPUNCTA Nyl. – on smooth bark of willow, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, leg. VT, 09.06.2018, PZV; on bark of aspen, 63°30'7.0"N 36°38'20.0"E, Spin, 24.06.2018, leg. AV, PZV.

ARTHONIA PATELLULATA Nyl. – on smooth bark of aspen, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 08.06.2018, leg. VT, PZV.

ARTHONIA RADIATA (Pers.) Ach. – on bark of aspen, 63°20'53.6"N 36°33'18.5"E, Smyrt, 14.06.2011, leg. VT, PZV.

ARTHOPYRENIA GRISEA (Schleich. ex Schaer.) Körb. – on decaying wood, 63°30'51.1"N 36°37'28.2"E, E, Sbir, Sroc, 06.06.2018, leg. VT, PZV.

+ARTHOHELIMUM SCANDINAVICUM Th. Fr. – on bark of standing deadwood of spruce, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT, PZV.

! ATHALLIA HOLOCARPA (Hoffm.) Arup et al. – on bark of aspen, 63°19'45.9"N 36°42'17.5"E, 63°19'33.4"N 36°42'40.4"E, 63°19'33.4"N 36°42'40.4"E, AbVi, Basp, Psph, 01-08.07.2016, leg. TP, SYKO.

ATHALLIA PYRACEA (Ach.) Arup et al. – on bark of aspen, 63°19'39.3"N 36°42'15.6"E, 63°18'01.7"N 36°41'12.9"E, AbVi, Aher, 16.06.2011, leg. VT, PZV.

! BACIDINA ASSULATA (Körb.) S. Ekman – on bark of willow, 63°18'01.7"N 36°41'12.9"E, Aher, 16.06.2011, leg. VT, PZV. Nemoral species with the Euroasian and American distribution range (Fadeeva, 2005). Distribution in Russia: Republic of Karelia, Leningrad Region, Kaliningrad Region, Omsk Region, Novosibirsk Region, Eastern Sayan Mountains, Primorsky Region (Golubkova, 2003). The closest finding: province of *Karelia onegensis* in the Republic of Karelia (Fadeeva et al., 2007). Distribution in the world: Europe, Asia, North America (Golubkova, 2003).

BIATORA BECKHAUSII (Körb.) Tuck. – on bark of willow, 63°18'01.7"N 36°41'12.9"E, Aher, 16.06.2011; on bark of birch and rowan, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 08.06.2018, leg. VT, PZV.

*BIATORA HELVOLA* Körb ex Hellb. – on bark of deciduous trees, 63°19'39.3"N 36°42'15.6"E, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, AbVi, 16.06.2011, 08.06.2018, leg. VT, PZV.

! *BIATORA HEMIPOLIA* (Nyl.) S. Ekman & Printzen – on bark of willow, 63°19'39.3"N 36°42'15.6"E, Rsh, 16.06.2011, leg. VT, PZV.

! *BIATORA PALLENS* (Kullh.) Printzen – on trunk and branches of juniper, on decaying wood, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT; on spruce, 63°30'41.4"N 36°37'14.4"E, 63°29'19.9"N 36°41'51.6"E, Ssph, Sher, 14.06.17, 23.06.2018, leg. AV, PZV; on bark of willow, on branches of spruce and birch, 63°19'45.9"N 36°42'17.5"E, 63°19'20.2"N 36°42'57.1"E, Pmyr, Bher, 25.06.–01.07.2016, leg. ECh, TP, det. TP, SYKO.

! *BILIMBIA MICROCARPA* (Th. Fr.) Th. Fr. – on bark of aspen, 63°20'53.6"N 36°33'18.5"E, Smyr, 14.06.2011, leg. VT; 63°30'25.2"N 36°36'54.7"E, Sher, 63°30'8"N 36°38'20.5"E, Smyr, 13.06.2017, 24.06.2018, leg. AV, PZV.

*BILIMBIA SABULETORUM* (Schreb.) Arnold – on bark and mossy trunk of aspen, 63°17'58.4"N 36°40'55.2"E, 63°21'05.6"N 36°43'27.7"E, Aher, Basp, 06.07.2016, leg. TP, SYKO.

*BRYORIA BICOLOR* (Ehrh.) Brodo & D. Hawksw – on birch, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, Ssph, 11.06.2017, leg. AV; on boulders, 06.06.2018, leg. VT, PZV.

*BRYORIA NADVORNIKIANA* (Gyeln.) Brodo & D. Hawksw. – on bark and wood of spruce and birch, juniper, rowan, pine, 63°23'47.1"N 36°36'43.1"E, 63°22'36.7"N 36°46'36.4"E, 63°30'51.1"N 36°37'28.2"E, 63°30'39.3"N 36°35'49.4"E, Ssph, Sher, Sroc, Sbir, 18.06.2010, 15.06.2011, 11.06.2018, leg. VT; 11.06.2017, leg. AV, PZV; 63°19'20.2"N 36°42'57.1"E, 63°20'01.9"N 36°42'-37.8"E, 63°19'19.6"N 36°43'12.2"E, 63°20'24.3"N 36°43'22.9"E, Bher, Bspf, Spin, 01–06.07.2016, leg. TP, SYKO.

*BRYORIA SIMPLICIOR* (Vain.) Brodo & D. Hawksw. – on bark and wood of pine and spruce, 63°20'24.3"N 36°43'22.9"E, 63°16'50.28"N 36°39'35.28"E, Bspf, Pmyr, 05–07.06.2016, leg. TP, SYKO.

*BUELLIA GRISEOVIRENS* (Turner & Borrer ex Sm.) – on spruce, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, on decaying wood, 06.06.2018, leg. VT; 63°29'19.9"N 36°41'51.6"E, Sher, 14.06.2017, leg. AV, PZV; on bark of trunks and stumps of

birch, 63°20'01.9"N 36°42'37.8"E, 63°20'07.2"N 36°40'06.4"E, Bspf, Bher, 01–03.07.2016, leg. TP, SYKO.

*CALCIUM SALICINUM* Pers. – on wood of spruce, 63°21'46.7"N 36°44'00.1"E, Sher, 05.06.2016, leg. TP, SYKO.

*CALOPLACA BOREALIS* (Vain.) Poelt – on smooth bark of rowan, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT, PZV.

! *CALOPLACA SOROCARPA* (Vain.) Zahlbr. – on bark of rowan, 63°21'05.6"N 36°43'27.7"E, 63°19'33.4"N 36°42'40.4"E, Basp, Psph, 02.07.2016, 08.07.2016, leg. TP, SYKO.

*CANDELARIELLA VITELLINA* (Hoffm.) Müll. Arg. – on bark of willow, 63°19'39.3"N 36°42'15.6"E, AbVi, Rsh, 16.06.2011, leg. VT, PZV.

! *CANDELARIELLA XANTHOSTIGMA* (Ach.) Lettau – on bark of willow and aspen, 63°19'39.3"N 36°42'15.6"E, 63°18'01.7"N 36°41'12.9"E, AbVi, Rsh, Aher, 16.06.2014, leg. VT; on spruce, 63°29'26.3"N 36°34'9.1"E, Sher, 12.06.2017, leg. AV, PZV; on worked timber and bark of rowan, 63°19'45.9"N 36°42'17.5"E, AvVi, 01.06.2016, leg. TP, SYKO.

! *CARBONICOLA MYRMECINA* (Ach.) Bendiksby & Timdal – on burnt pine wood, 63°17'37.6"N 36°40'52.1"E, Psph, 06.07.2016, leg. TP, SYKO.

! *CATILLARIA ERYSIBOIDES* (Nyl.) Th. Fr. – on branch of spruce, 63°23'47.1"N 36°36'43.1"E, Sher, 15.06.2014, leg. VT, PZV.

*CATINARIA ATROPURPUREA* (Schaer.) Vězda & Poelt – on bark of willow and aspen, birch, 63°23'47.1"N 36°36'43.1"E, 63°18'01.7"N 36°41'12.9"E, 63°30'51.1"N 36°37'28.2"E, Sher, Aher, Sbir, Sroc, 15–16.06.2014, 08.06.2018, leg. VT; 63°30'22.0"N 36°35'34.9"E, 63°30'08"N 36°38'20.5"E, Psph, Smyr, 12.06.2017, 24.06.2018, leg. AV, PZV.

! *CATINARIA NEUSCHILDII* (Körb.) P. James – on bark of aspen, 63°20'53.6"N 36°33'18.5"E, Sbir, Sroc, 06.06.2018, leg. VA; 63°30'25.2"N 36°36'54.7"E, Sher, 13.06.2017, leg. AV, PZV.

*CETRARIA ODONTELLA* (Ach.) Ach. – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 09.06.2018, leg. VT, PZV.

*CHAENOTHECA BRACHYPODA* (Ach.) Tibell – on wood of aspen and spruce, 63°20'53.6"N 36°33'18.5"E,

63°30'51.1"N 36°37'28.2"E, Smyr, Sbir, Sroc, 14.06.2011, 09.06.2018, leg. VT, PZV; on wood of fallen tree and stumps of birch, 63°21'02.1"N 36°43'30.7"E, 63°17'58.4"N 36°40'55.2"E, Spin, Aher, 03.07.2016, leg. TP, SYKO.

! CHAENOTHECA LAEVIGATA Nádv. – on wood of birch stump, 63°19'33.9"N 36°39'10.0"E, Bher, 03.07.2016, leg. TP, SYKO.

! CHAENOTHECA PHAEOCEPHALA (Turner) Th. Fr. – on bark of spruce, 63°20'53.6"N 36°33'18.5"E, Sbir, Sroc, 08.06.2018, leg. VT, PZV; on bark of pine, 63°19'33.9"N 36°39'10.0"E, Bher, 03.07.2016, leg. TP, SYKO.

CHAENOTHECA STEMONEA (Ach.) Müll. Arg. – on bark of spruce, 63°23'47.1"N 36°36'43.1"E, Sher, Smyr, 15.06.2011, leg. VT, PZV; 63°20'38.4"N 36°43'09.5"E, 63°21'46.7"N 36°44'00.1"E, Bher, Sher, 04.07.2016, leg. TP, SYKO.

! #CHAENOTHECOPSIS NIGRA Tibell – on thalli of *Chaenotheca stemonea* and *C. furfuracea* growing on bark and roots of spruce, 63°20'53.6"N 36°33'18.5"E, 63°23'47.1"N 36°36'43.1"E, Sher, Smyr, 14–15.06.2011, leg. VT, PZV.

! #CHAENOTHECOPSIS PUSILLA (Ach.) A. F. W. Schmidt – on thalli of *Chaenotheca* sp. and free-living algae over bark and wood of spruce, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 08.06.2018, leg. VT; 63°34'05.2"N 36°28'11.2"E, Smyr, Ssph, 10.06.17, 63°30'51.2"N 36°37'36.1"E, Sroc, 24.06.2018, leg. AV, PZV; 63°21'17.2"N 36°43'24.6"E, 63°21'46.7"N 36°44'00.1"E, 63°17'22.9"N 36°40'24.1"E, Psph, Sher, Pspr, 01–03.07.2016, leg. TP, SYKO.

! CHEIROMYCINA FLABELLIFORMIS B. Sutton – on bark of willow, 63°21'05.6"N 36°43'27.7"E, Basp, 02.07.2016, leg. TP, SYKO.

! CHRYSOTHRIX CANDELARIS (L.) J. R. Laundon – on shaded rock, 63°20'53.6"N 36°33'18.5"E, Smyr, 09.06.2018, leg. VT, PZV.

CHRYSOTHRIX CHLORINA (Ach.) J. R. Laundon – on shaded rock, on boulders, 63°17'58.4"N 36°40'55.2"E, 63°16'15.06"N 36°39'49.26"E, R, Pmyr, 02–07.07.2016, leg. TP, SYKO.

CLADONIA BELLIDIFLORA (Ach.) Schaer. – on stones and boulders with thin soil layer and on mossy boulders, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 09.06.2018, leg. VT; 63°34'05.2"N 36°28'11.2"E, Sbir, Sroc, 11–15.06.17, leg. AV, PZV; 63°20'27.12"N 36°36'09.78"E, 63°17'09.3"N

36°39'34.7"E, Sroc, Pspr, 03.06.2016, leg. TP, SYKO. RA.

CLADONIA CARNEOLA (Fr.) Fr. – on decaying wood, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 09.06.2018, leg. VT, PZV.

CLADONIA CHLOROPHAEA (Flörke ex Sommerf.) Spreng. – on soil, at trunk base, on fallen trees, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, Smyr, 09.06.2018, leg. VT; on stones, 10–11.06.2017, leg. AV, PZV; on birch and boulders, 63°25'45.9"N 36°38'17.5"E, 28.06.2016, 63°20'27.12"N 36°36'09.78"E, Sher, Sroc, 28.06–03.07.2016, leg. ECh; on soil and bark of willow, 63°19'45.9"N 36°42'17.5"E, 63°20'01.9"N 36°42'37.8"E, 63°21'05.6"N 36°43'27.7"E, AbVi, Bspf, Basp, 03.07.216, leg. TP, SYKO. The specimens contain fumarprotocetraric acid.

CLADONIA CORNUTA subsp. GROENLANDICA (Å.E. Dahl) Ahti – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 08.06.2018, leg. VT & AV; 63°34'05.2"N 36°28'11.2"E, 63°29'19.9"N 36°41'51.6"E, Sbir, Sroc, Sher, 12–14.06.2017, leg. AV, PZV.

CLADONIA CYANIPES (Sommerf.) Nyl. – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 09.06.2018, leg. VT, PZV.

CLADONIA MACROPHYLLA (Schaer.) Stenh. – on stones and boulders with thin soil layer, on mossy boulders, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 09.06.2018, leg. VT; 11.06.2017, leg. AV, PZV; 63°16'15.06"N 36°39'49.26"E, R, 03.06.2016, leg. ECh, det. TP, SYKO.

! CLADONIA NOVOCHLOROPHAEA (Sipman) Brodo & Ahti – on worked timber, 63°19'45.9"N 36°42'17.5"E, 01.07.2016, leg. TP, det. I. S. Stepanchikova, SYKO. The specimens contain fumarprotocetraric, homosekikaic and sekikaic acids.

CLADONIA OCHROCHLORA Flörke – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT, PZV.

CLADONIA PHYLOPHORA Hoffm. – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT; 11.06.2017, leg. AV, PZV; 63°20'40.3"N 36°43'24.6"E, 63°21'02.0"N 36°43'30.0"E, 63°17'18.6"N 36°39'50.4"E, FR, Proc, 03.06.2016, leg. TP, SYKO.

*CLADONIA POLYDACTYLA* (Flörke) Spreng. – on boulders with thin soil layer and trunk base of spruce, 63°25'45.9"N 36°38'17.5"E, Sher, 28.06.2016, leg. ECh; 63°20'40.3"N 36°43'24.6"E, FR, 63°19'19.6"N 36°43'12.2"E, Pspf, 02–03.07.2016, leg. TP, SYKO.

*CLADONIA SUBFURCATA* (Nyl.) Arnold – on stones and boulders with thin soil layer, on mossy boulders, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT, PZV; 63°25'14.76"N 36°38'13.62"E, 63°16'15.06"N 36°39'49.26"E, Sw, Plich, R, 26.06–3.07.2016, leg. ECh, det. TP, SYKO.

*CLADONIA VERTICILLATA* (Hoffm.) Schaer. – on mossy boulder, 63°17'18.6"N 36°39'50.4"E, Proc, 06.07.2016, leg. TP, SYKO.

*COENOGONIUM PINETI* (Ach.) Lücking & Lumbsch – on smooth bark of rowan, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 06.06.2018, leg. VT; on bark of willow, 63°30'07.8"N 36°35'07.9"E, Sbir, 06.06.2018, leg. AV, PZV.

*COLLEMA FURFURACEUM* (Arnold) Du Rietz – on bark of aspen, 63°23'47.1"N 36°36'43.1"E, Sher, 15.06.2011, leg. VT, PZV.

*DIPLOTOMMA ALBOATRUM* (Hoffm.) Flot. – on bark of willow, 63°19'39.3"N 36°42'15.6"E, Rsh, 16.06.2011, leg. VT, PZV

*!EPHEBE LANATA* (L.) Vain. – on rocks, 63°16'15.06"N 36°39'49.26"E, R, 07.07.2016, leg. ECh, det. TP, SYKO.

*EVERNIA PRUNASTRI* (L.) Ach. – on worked timber, on bark of willow, rowan and pine, rarely birch, 63°19'39.3"N 36°42'15.6"E, 63°18'01.7"N 36°41'12.9"E, AbVi, Aher, 16.06.2011, leg. VT; 63°30'07.8"N 36°35'07.9"E, Pspf, 06.06.2018, leg. AV, PZV; 63°20'01.9"N 36°42'37.8"E, 63°20'38.4"N 36°43'09.5"E, 63°21'05.6"N 36°43'27.7"E, Bspf, Basp, 02.07.2016, leg. TP, SYKO.

*!EOPYRENULA LEUCOPLACA* (Wallr.) R.C. Harris – on bark of aspen, 63°17'22.9"N 36°40'24.1"E, Sspf, 03.07.2016, leg. TP, SYKO.

*FLAVOCETRARIA NIVALIS* (L.) Kärnfeldt & A. Thell – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 09.06.2018, leg. VT, PZV.

*!FRUTIDELLA CAESIOATRA* (Schaer.) Kalb – on stones and boulders with thin soil layer, 63°30'51.1"N 36°37'28.2"E, Sbir, Sroc, 11.06.2018, leg. VT, PZV.

*!GYALECTA FAGICOLA* (Hepp ex Arnold) Kremp. – on bark of willow, aspen and birch, 63°18'01.7"N 36°41'12.9"E, Aher, 16.06.2011, leg. VT, PZV; 63°20'01.9"N 36°42'37.8"E, 63°21'02.1"N 36°43'30.7"E, Bspf, Pspf, 02–05.07.2016, leg. TP, SYKO.

*!GYALECTA TRUNCIGENA* (Ach.) Hepp – on smooth bark of young aspen, 63°20'53.6"N 36°33'18.5"E, Sbir, Sroc, 09.06.2018, leg. VT, PZV.

*GYALOLECHIA FLAVORUBESCENS* (Huds.) Søchting et al. – on bark of aspen, 63°20'53.6"N 36°33'18.5"E, 63°19'54.5"N 36°34'49.0"E, 63°23'47.1"N 36°36'43.1"E, 63°19'39.3"N 36°42'15.6"E, 63°18'01.7"N 36°41'12.9"E, Smyr, Proc, Sher, AbVi, Aher, 11–16.06.2018, leg. VT, PZV.

*HYPOGYMNIA BITTERI* (Lynge) Ahti – on bark of spruce, birch and wood, 63°20'53.6"N 36°33'18.5"E, Sbir, Sroc, 09.06.2018, leg. VT, PZV.

*LECANIA CYRTELLA* (Ach.) Th. Fr. – on smooth bark of willow, aspen and rowan, 63°23'47.1"N 36°36'43.1"E, 63°18'01.7"N 36°41'12.9"E, 63°30'51.1"N 36°37'28.2"E, Sher, Aher, Sbir, Sroc, 15–16.06.2011, 09.06.2018, leg. VT, PZV.

*!LECANIA CYRELLINA* (Nyl.) Sandst. – on bark of willow, aspen and pine, 63°20'53.6"N 36°33'18.5"E, 63°19'54.5"N 36°34'49.0"E, 63°18'01.7"N 36°41'12.9"E, 63°30'51.1"N 36°37'28.2"E, Smyr, Proc, Aher, Sbir, Sroc, 14–16.06.2011, 09.06.2018, leg. VT, PZV.

*LECANIA NAEGELII* (Hepp) Diederich & van den Boom – on bark of willow, aspen and pine, 63°20'53.6"N 36°33'18.5"E, 63°19'39.3"N 36°42'15.6"E, Smyr, AbVi, 14–16.06.2011, leg. VT, PZV.

*!LECANORA AITEMA* (Ach.) Hepp – on thin branches of spruce, 63°19'33.9"N 36°39'10.0"E, Bher, 03.07.2016, leg. TP, SYKO.

*LECANORA ALBELLULA* var. *ALBELLULA* (Nyl.) Th. Fr. – on bark of aspen and juniper, 63°23'47.1"N 36°36'43.1"E, 63°30'51.1"N 36°37'28.2"E, Sher, Sbir, Sroc, 16.06.2011, 09.06.2018, leg. VT; on trunk and branches of birch, 63°30'52.2"N 36°34'46.4"E, Sbir, 23.06.2018, leg. AV, PZV.

*LECANORA ALLOPHANA* Nyl. – on bark of willow, aspen and rowan, 63°20'53.6"N 36°33'18.5"E, 63°19'54.5"N 36°34'49.0"E, 63°23'47.1"N

36°36'43.1"E, 63°19'39.3"N 36°42'15.6"E, 63°18'01.7"N 36°41'12.9"E, 63°30'51.1"N 36°37'28.2"E, Smyr, Proc, Sher, AbVi, Aher, Sbir, Sroc, 14–16.06.2011, 09.06.2018, leg. ## DISCUSSION

In total, 155 species of lichens and allied fungi were recorded for the first time for Arkhangelsk part of Vodlozersky National Park. Thus, 342 and 3 subspecies of lichens are currently known from the Arkhangelsk part of the Park (Tarasova et al., 2016).

The species *Cladonia bellidiflora*, included in the Red Data Book of Arkhangelsk Region (2008), was recorded for the first time in Arkhangelsk part of the Park. In the neighboring territory of Karelia which has been studied much better, eight species of the presented list are regionally protected (Red Data Book of Karelian Republic, 2007): *Bryoria bicolor*, *B. nadvornikiana*, *Chae-notheca stemonea*, *Hypogymnia bitteri*, *Nephroma bellum*, *Ramalina dilacerata*, *Sclerophora coniophaea* and *Stereocaulon dactylophyllum*; five of these species are included also in the Red Data Book of East Fennoscandia (Kotiranta et al., 1998): *Bryoria bicolor*, *B. nadvornikiana*, *Chae-notheca stemonea*, *Sclerophora coniophaea* and *Stereocaulon dactylophyllum*.

In the list 69 species are new for the mainland area of the Arkhangelsk Region. Altogether 514 lichens and allied fungi are known nowadays for the mainland area of the Arkhangelsk Region,

taking into consideration data on 445 species known from the region before (Tarasova et al., 2015, 2016).

The results of the presented study demonstrate significant potential of the lichen diversity in the territory of Vodlozersky National Park including its Arkhangelsk part.

## ACKNOWLEDGEMENTS

We would like to express our gratitude to Orvo Vitikainen for confirmation of *Peltigera* specimens and the staff of Vodlozersky National Park (Viktor Mamontov, Maria Shreders, Vasily Ruchyovskih & Sergei Zakutin) for help in organizing the expedition to the localities hard to reach; D. E. Himelbrant and I. S. Stepanchikova are thanked for assistance in the identification of some taxa and consultations. Thanks are given to Elena Yu. Churakova for collections of lichen specimens. We are grateful to the editors and reviewers for valuable corrections and recommendations which have improved the quality of our work.

The study was supported by the Ministry of Education and Science of the Russian Federation (project No 5.8740.2017/k); additional support was given by the Institute of Biology of Komi Scientific Centre of the Ural Branch and Avrorin Polar-Alpine Botanical Garden-Institute of the Russian Academy of Sciences (institutional projects No AAAA-A19-119011790022-1 and AAAA-A18-118050490088-0) and administration of Vodlozersky National Park.
