

5.B. PROF. DR. MATTI RAUDJÄRV – SCIENCE POPULARISATION AND MOST IMPORTANT PUBLIC PRESENTATIONS

(incl. presentations at scientific conferences and presentations-lectures at academic institutions)

Approximately 120 presentations have been given in 1975–2019 at important research forums, presentations have been given and high-volume cycles of lectures and workshops have been conducted (and repeatedly) in also many other countries besides Estonia, such as:

- **Austria**
- **Georgia**
- **Greece**
- **Lithuania**
- **Federal Republic of Germany**
- **Turkey**
- **Ukraine**
- **Hungary**
- **Russia**

In addition, approximately 30 presentations have been given in 1975–1988 **in Estonia, Latvia and Lithuania:** at the scientific conferences of young economists of Estonian research institutions and institutions of higher education and the Estonian Club of Young Economists and **annual** scientific conferences of young economists of the **Baltic States**, mostly also accompanied by the respective publications.

Many scientific presentations have been given also at scientific conferences and workshops (in Armenia, Byelorussia, Kazakhstan, Latvia, Lithuania, Russia, Ukraine, Uzbekistan, and other countries and also papers/theses have been published there) not listed among the “List of Research Projects” of this publication but in the longer written electronic list of research papers attached to the longer CV of Matti Raudjärv. The work of sections has often been chaired at workshops/conferences of economists.
