

THE YEAR 2022 – OUR COOPERATION PARTNER, GERMAN RESEARCH PUBLISHING, COMPLETES 60 YEARS OF ESTABLISHMENT

The Publisher

For 60 years, the Berliner Wissenschafts-Verlag has been at home in the humanities and is now part of a ¹family-run publishing group.

Every year about 100 new publications and 9 journals reflect our experience in quality-conscious publishing and the close contacts to leading institutions of Berlin as a science location. Together with national and international editorial boards and research institutions, we publish around 65 series of publications.

A total of almost 2,000 titles are currently available.

The Program

Programmatically, the publishing focus is on the social sciences and humanities. As a specialist publisher with 60 years of tradition, the Berliner Wissenschafts-Verlag maintains an interdisciplinary programme in the fields of law, politics and economics, history and public administration.

We focus on regional areas in Eastern European law and eastern European studies, in northern European studies and in the history of Berlin, Brandenburg and Prussia. In the latter area, the Berliner Wissenschafts-Verlag is one of the leading specialist publishers in Germany.

History of the publishing house

Founded in 1962 in Berlin-Dahlem as "Berlin Verlag Arno Spitz", the Berliner Wissenschafts-Verlag can look back on a history that was closely linked to the city of Berlin from the very beginning. Arno Spitz, who returned to Berlin on the occasion of the construction of the Berlin Wall in 1961, set himself the goal of making a contribution to overcoming the social and political confrontation between East and West by founding the publishing house. Accordingly, in the following years he built up his publishing program in the fields of international law, political science and political science – with a special focus on Eastern European studies and Berlin topics.

In 2002, the publishing house received a new name, which it still bears today: Berliner Wissenschafts-Verlag. The new publishing management significantly expanded the program, especially in the area of Law: Legal History, and set new priorities with Public Administration & Economy as well as Environment & Energy.

In 2011, the Berliner Wissenschafts-Verlag took over Pro Universitate Verlag GmbH as Imprint Verlag.

Since 2015, the Berliner Wissenschafts-Verlag has belonged to Franz Steiner Verlag in Stuttgart and thus to mediengruppe Deutscher Apotheker Verlag.

Friendly and successful cooperation between the German publishing house Berliner Wissenschafts-Verlag and the Estonian publishing house Mattimar OÜ in publishing the scientific journal “Estonian Discussions on Economic Policy” has taken place since 2001. The magazine has been published under this name since 2007, but was founded in 1984.

Congratulations and fruitful cooperation,

May 2022, Tallinn-Estonia

Editor of Mattimar OÜ/Ltd and the scientific journal
“Estonian Discussions on Economic Policy”
and
editor-in-chief Matti Raudjärv
